

Vibe-Pythonpass: Security Update Distribution & Patch Management Policy

- **Vulnerability Intake**

- Report vulnerabilities to: security@vibe-pythonpass.io
- Responsible disclosure timeframe: 90 days

- **Triage & Assessment**

- Critical: CVSS 9.0-10.0 → Fix within 24 hours, release within 48 hours
- High: CVSS 7.0-8.9 → Fix within 72 hours, release within 1 week
- Medium: CVSS 4.0-6.9 → Fix within 2 weeks, release in regular cycle
- Low: CVSS 0.1-3.9 → Include in next regular release

- **Patch Release Strategy**

- Automated deployment to cloud infrastructure
- Browser extension updates via Chrome Web Store (auto-deployment: 4 hours)
- Mobile app updates via App Store/Play Store (can take 24-48 hours for approval)
- Frontend: Deployed via CDN, cached version expires after 1 hour

- **Customer Notification**

- Email notification sent before patch deployment
- In-app notification banner for 14 days
- Security advisory blog post published
- Release notes with vulnerability details and remediation info

- **Backward Compatibility**

- Maintain support for API version N-2 (last 2 versions)
- Deprecation warnings given 6 months in advance

- Migration guide provided for breaking changes
