

Database Server Memory Specification

- Component Name: Production Database Memory Module
- Type: Server-grade RAM (DDR4)
- Specification: 64GB ECC Memory Module
- Purpose: Primary memory for SQLite database and Flask application processes
- Redundancy: Dual module configuration for high availability
- Environmental Specifications: Operating temperature 0-45°C, ECC error correction
- Maintenance Schedule: Annual health check and diagnostics
- Supplier: Dell Technologies (Part: SNPJJKDMC/64G)
